

VersiTech®

Series 2000

Single-Liquid Spray System

The VersiTech® Series 2000 is designed for dispensing single liquids. It is well suited to the manufacturer who sees the marketing advantages of ergonomics and reliability. Features include heavy-duty boss and pin pivoting triggers, check balls and springs, and optional 38mm SnapSeal Closures® to eliminate leakage and increase bottle-fill rates by 25%.

SPRAYHEAD OPTIONS:

- 28 mm Closure
- 38 mm Closure
- 38 mm SnapSeal Closure®
- Stream/Spray/Off Tip
- Ultra-Fine Spray/Off Tip
- Stream/Spray/Foam/Off Tip
- Foam/Off Tip
- Child-Resistant Feature
- 2-Finger Trigger
- 3-Finger Trigger
- Formula-Specific Components
- VersiTech® 2000 1-Piece Cover
- Custom Cover Available
- Custom Colors Available

SERIES 2000

Single-Liquid Spray System

The VersiTech Series 2000 is ideal for dispensing single liquids in a wide variety of chemical applications.

OPTIONS

Closure Options:

- 28mm/400, 28mm/410
- 38mm/400, 38mm/SnapSeal Closure®

Spray Tip Options*:

- Stream/Spray/Off
- Ultra-fine Spray/Off
- Stream/Spray/Foam/Off
- Foam/Off

* Child-Resistant feature available on all spray tip options

Trigger Options:

- 2-Finger trigger
- 3-Finger trigger

Color Options:

Custom Colors Available

SPECIFICATIONS

Cover: VersiTech 2000 1-Piece Cover (Optional custom covers available)

Capacity: 1.22cc pump volume/stroke

Height: 2.325 in.

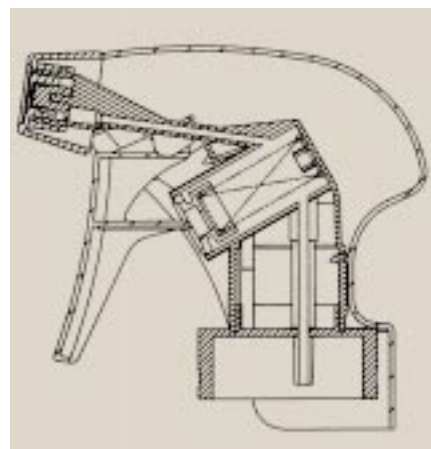

Compatibility: Formula-Specific components with laboratory testing

Shipping Capability: Safely ships assembled to filled container

SERIES 3000

Dual-Liquid Fixed-Ratio Spray System

The VersiTech Series 3000 is designed to dispense two liquids at the same time at a permanently fixed dilution ratio. Ideal for concentrated liquids and two-part reactive chemicals. Series 3000 sprayers can be manufactured to be used with chemical refills or to be completely disposable.

OPTIONS

Reservoir and Closure Options:

- FormuLiner® System with 38mm SnapSeal Closure®
- Chem-Core® Cartridge System with 38mm Quarter-Turn Closure
- Tandem System with 38mm Quarter-Turn Closure

Spray Tip Options*:

- Stream/Spray/Off
- Ultra-fine Spray/Off
- Stream/Spray/Foam/Off
- Foam/Off

* Child-Resistant feature available on all spray tip options

Trigger Options:

- 2-Finger Trigger
- 3-Finger Trigger

Color Options:

Custom Colors Available

SPECIFICATIONS

Cover: VersiTech 3000 1-Piece Cover (Optional custom covers available)

Capacity: 1.22cc pump volume/stroke

Height: 2.325 in.

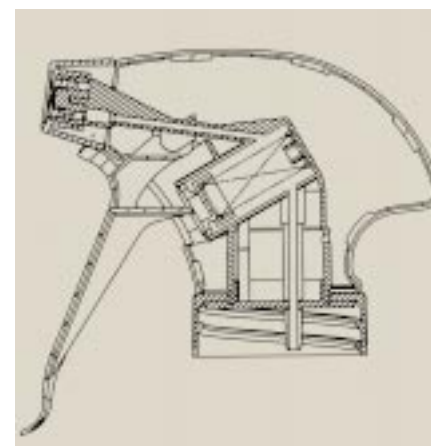

Compatibility: Formula-Specific components with laboratory testing

Shipping Capability: Safely ships assembled to filled container

SERIES 4000

Dual-Liquid Variable-Ratio Spray System

The VersiTech Series 4000 is perfect for dispensing two liquids simultaneously while allowing the user to adjust the ratio of the two liquids. Well suited to a single, concentrated liquid with multiple applications dependent upon its dilution ratio to water. Designed to use with refills, Series 4000 sprayers are manufactured with the highest quality components to ensure longevity.

OPTIONS

Reservoir and Closure Options:

- Chem-Core® Cartridge System with 38mm Quarter-Turn Closure
- Tandem System with 38mm Quarter-Turn Closure

Spray Tip Options*:

- Stream/Spray/Off
- Ultra-fine Spray/Off
- Stream/Spray/Foam/Off
- Foam/Off

* Child-Resistant feature available on all spray tip options

Trigger Options:

- 3-Finger Trigger

Color Options:

Custom Colors Available

SPECIFICATIONS

Cover: VersiTech 4000 Ergonomic Cover

Capacity: 1.22cc pump volume/stroke

Height: 2.356 in.

Compatibility: Formula-Specific components with laboratory testing

Shipping Capability: Safely ships assembled to filled container

VersiTech

Versatile spray technology for the 21st century

DUAL AND SINGLE LIQUID SPRAY SYSTEMS

VersiTech® products are manufactured by Take 5 in the USA with pride. For more information about Take 5 VersiTech® Spray Systems call: Tel: 541 582 2857 Fax: 541 582 2836 Web: www.take5net.com P.O. Box 2057, Rogue River, OR 97537

Introducing Versitech® Dual-Liquid Spray Systems from Take 5 — Harmonizing technology with our environment

Take 5 has dedicated years to the manufacture and development of dual-liquid trigger sprayers that enable chemical manufacturers to offer consumers an easy and efficient means to dispense concentrates and new two-part reactive chemicals. Manufacturers are now able to harmonize marketing of their chemical technology with environmental responsibility by reducing materials, waste, and shipping costs.

The strength of Take 5's technology is based on its unique, patented mixing design that prevents the two fluids from mixing until they enter the piston chamber, resulting in a consistent, controllable ratio of one fluid to the other when sprayed.

Now Take 5 offers manufacturers VersiTech® - a series of custom single and dual-liquid trigger sprayers that utilize a system of modular components built on a basic frame to reduce manufacturing costs while allowing the manufacturer to choose the function and finish design particular to its own product applications. This custom design feature supports the manufacturer in developing and maintaining strong brand identification.

FIXED-RATIO SYSTEMS

VersiTech Series 3000 fixed-ratio sprayers dispense two liquids at the same time at a permanently fixed dilution ratio ranging from 0:1 to 50:1 as predetermined by manufacturer's specification. This method is ideal for concentrated liquids and for two-part reactive chemicals that typically have a short shelf life once they have been mixed together. VersiTech fixed-ratio sprayers are designed to be used with chemical refills or to be entirely disposable.

VARIABLE-RATIO SYSTEMS

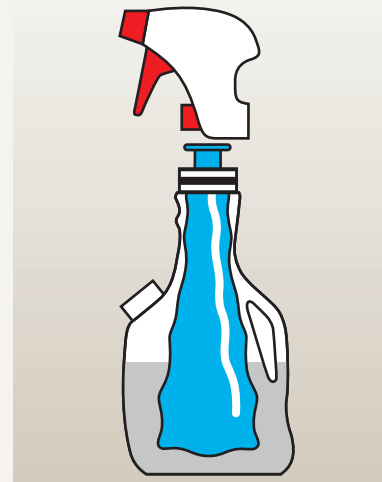

VersiTech Series 4000 variable-ratio sprayers dispense two liquids at the same time and allow the user to adjust the ratio of the dispensed fluids with a dilution-control dial. This sprayer is suited to a single, concentrated liquid that has multiple applications dependent upon its dilution rate. Designed to be re-used with concentrated refills, Series 4000 sprayers are made of the highest quality components to ensure long life.

INNOVATIVE RESERVOIR SYSTEMS

Versitech Series 3000 and Series 4000 Sprayers deliver the most advanced dual-liquid reservoir systems available.

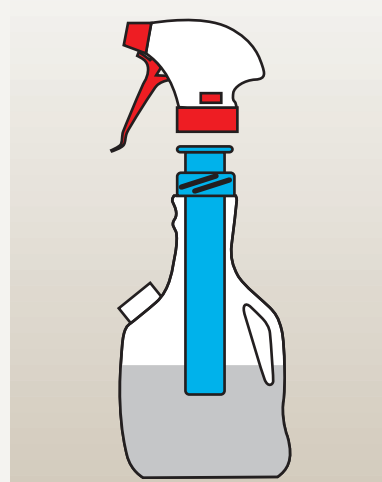

FormuLiner® Reservoir System

- a disposable system for concentrates or two-part reactive chemicals featuring a small chemical bag inside the spray bottle with a patented SnapSeal Closure® that permanently seals to prevent leakage. When used with concentrates, the user simply adds water through the exterior port until the chemical is spent, then disposes of the container.

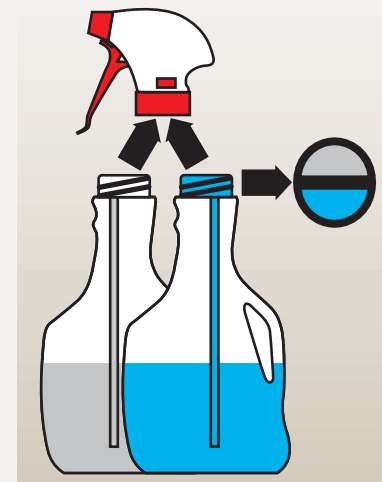

Chem-Core® Cartridge Reservoir System

- a durable, re-usable spray system for concentrates featuring a rigid drop-in chemical cartridge with a secure 38mm quarter-turn closure. The user simply fills and refills the spray bottle with water through an exterior port and replaces the chemical cartridges as needed.

Tandem Reservoir System

- a rugged, re-usable spray system for either concentrates or two-part reactive chemicals featuring tandem bottles with 38mm quarter-turn closures that fit under a common spray head.
